

# WHAT IS IV NUTRIENT THERAPY?

IV nutritional therapy (a.k.a. intravenous therapy, IV nutrition, IV therapy or IV nutrient therapy) is a type of therapy commonly used for its wide range of health benefits, which can include anti-aging, improved immune system, minimized anxiety, reversed symptoms of hangovers and more. Although many may believe that nutrient deficiencies aren't so common anymore, there are still many individuals who aren't getting the essential nutrients our bodies need to perform optimally. Because IV treatment is administered directly into the veins, the results may be faster than those of oral or other traditional medicines.

- 💧 BOOST ENERGY
- 💧 ANTI-AGING
- 💧 DETOXIFY
- 💧 REHYDRATE TISSUES
- 💧 ENHANCE IMMUNE SYSTEM
- 💧 OPTIMIZE RECOVERY & MORE
- 💧 COMBAT CHRONIC FATIGUE
